AVIPHOT SHARP SHOOTERS FOR OPTIMUM HAZE PENETRATION

Agfa's range of high resolution panchromatic films, with increased infra-red sensitivity for optimum haze penetration, give clear sharp definitions between green and grey areas for even more accurate data assessment.

Available in 70mm, 126mm and 240mm wide rolls of film for low, medium or high altitude flying.

The Agfa aerial products range include continuous tone copying and paper materials for contact copies and mosaics.
